

We're changing the time frame in which we charge off negative accounts from 45 days to 60 days. We need these changes to be made to the current Negative Share Queue Notices and the "Negative Share Queue - 45 Day" report. The report will now need to be called "Negative Share Queue - 60 Day" and reflect only accounts that have been negative 60 days or more. The Negative Share Queue is currently broken up into accounts that are 0-15 days negative, 16-30 days negative, and 31-44 days negative. We need that shifted to now show 30-44 days negative and 45-59 days negative.

When generating the notices that get mailed to members, we type NEGATIVETNOTICE in the specfile and are prompted to choose either the 15 day or 30 day notice. We need that script changed to show 30 days and 45 days.
