For the Negative Share Queue, can we eliminate the list of accounts negative for 0-29 days and just have it for 30-44 days and 45-59 days? Otherwise, it's good and the Negative Share Queue - 60 Day report is good too. I tested the NEGATIVENOTICE2 script and that looks good. The only change we need is trimming down the Negative Share Queue and it's ready! Thanks!
